# Junkie Data entry for daily menu generation

<u>English Magyar Exit</u>

Hide bounds

#### Bounds

Remove all	Nourishment components	Minimum	Optimal	Maximum
Remove	Energy	271	286	300
Remove	Protein	64	66	71
Remove	Fat	21	25	29
Add	valid			

Generate menu for • a day • a week Defaults Save Generate

Basic Fitness algorithm: TDK Initial cset: 0

## Junkie Optimal daily menu

#### Your daily plan

		Energy	Protein	Fat
Topping	Racos sertes szelet	43	23	6
Garnish	Szekelyka <b>po</b> szta	58	26	7
Soup	Spargakremleves	159	1	1
Dessert	Malnas dessert 100 db	18	15	3
Drink	Gyunıolcsivole 5/1.	1		
	Daily total	279	65	17

Generation took 0:29.5 seconds.

Accuracy			
Nourishment component	Distance	Accuracy	
Energy	7	78.221954%	
Protein	1	75%	
Fat	8	-300%	
Total	10.677078	-48.926014%

### Database schema Postgres

- table inheritance
- type domains
- composite types
- arrays
- partial indices

#### **Moral lessons**

- Don't fear low marketshare technologies
- Do fear the Inferior But Marketable
- Investment in development tools pays back
